## **THE EARTH CALENDAR**

*is a highly innovative kind of calendar, whose special features give more meaning, energy and power to everyday life.*

*There are five essential points in this calendar:*

- the reckoning of the years starts again from zero, from the year in which two great cultural and scientific achievements, all mankind's inheritance, were reached: the birth of the Internet and the first walk on the Moon, to indicate a single turning point in the history of our Planet;*
- the days of the week are dedicated to the nurturing of positive qualities of the human soul, whose development results in indisputable benefits both to the individual and the community;*
- the dates of the astronomical events, the Equinoxes and the Solstices, that indicate the passing of seasons and therefore unite the whole world, are deservedly celebrated;*
- the names of days of the week and of months of the year are changed in order to give them a greater emotional, rational, and universalizing power;*
- from the subdivision of time in weeks, the social concept of septennia is born: regularly repeated periods of seven years, each having the same behavioral value of the corresponding day of the week, in order to give a functional rhythm to the fundamental activities of human beings not only in the short but also in the long run.*

*May every day of this year, and of future years, mark a positive step forward to a harmonious development for each of us and an auspicious evolution for all humankind!*
